OBJECTIVE

Motivated Artificial Intelligence and Machine Learning (AIML) student with strong foundations in Python, APIs, Generative AI, and workflow automation. Passionate about building AI-powered applications, AI agents, and intelligent automation solutions using Large Language Models (LLMs). Experienced in developing real-world AI projects and integrating modern technologies to solve business problems. Seeking an Automation Developer Intern role to contribute technical skills, learn enterprise automation practices, and deliver impactful AI-driven solutions.

EDUCATION

B.E in Artificial Intelligence & Machine Learning

Moodlakatte Institute of Technology

Expected Graduation 2027 | SGPA : 7.86

Diploma in Mechanical Engineering

Government Polytechnic Udupi

Completed | 2021-2024 | CGPA : 7.26

TECHNICAL SKILLS

Programming: Python

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, FastAPI, Streamlit, LangChain

AI/ML: Machine Learning, Data Preprocessing, Model Training, NLP, RAG, LLMs, Prompt Engineering, Vector Databases

NLP: Text processing, basic NLP techniques | Tools: Antigravity, Google Colab | APIs: REST APIs, API Integration

PROJECTS

Personal Portfolio Website

- Developed a responsive personal portfolio website using React and Tailwind CSS to showcase projects, technical skills, certifications, and contact information, with a modern, mobile-friendly UI focused on usability, responsive design, and clean visual presentation across all devices.

LLM Hallucination Detection

- Large Language Models (LLMs) can generate confident but factually incorrect responses (hallucinations). This project integrates multiple LLM APIs and uses RAG with Brave Search to verify responses against trusted sources, measure factual accuracy, and compare hallucination rates across different models.

Legal AI Assistant (Chatbot)

- Accessing legal information can be complex and time-consuming for individuals without legal expertise. This project uses the Gemini API to provide an AI-powered legal assistant that answers legal queries, explains legal concepts in simple language, and assists users in understanding legal documents and procedures through a conversational interface.

DECLARATION

I hereby declare that all the information provided above is true and correct to the best of my knowledge and I sincerely look forward to an opportunity to contribute my skills.
